

1 Offering

We serve global EV charging network operators and providers with a scalable, hardware-agnostic platform, generating profits for both the world's largest charging networks and new market entrants.

Bespoke billing capabilities

Enabling you to increase the profitability of your network.

Our billing functionality - with over 7 million billed transactions and counting - has been designed specifically for the EV charging industry and addresses every aspect of your operations, whatever your business model. Define, view and manage driver plans - you can do it all with our billing solution..

Increase end-user loyalty

The high driver satisfaction on our network speaks for itself.

Our white-labelled driver app can be designed to match your own company branding, providing simplicity and familiarity for your customers. With over 70,000 downloads to date, the app provides your drivers access to a wide range of dynamic options - from charger location and availability to reserve-ahead capability and many more.

Access all networks

Our roaming capability opens up access to thousands of charging stations.

Our platform allows our 300,000+ drivers to charge within all popular roaming hubs as well as in your own network of chargers. Through interoperability, our software handles authorization, token synchronization and transaction exchange.

ELECTRIC MOBILITY SERVICE PROVIDERS

Offer charging solutions to EV drivers registered to your service and grow your pool of users. Maintain a premium level of service with high levels of driver satisfaction and retention.

A mix of flexibility and convenience

Our extensive operational tools will optimize your own operations.

Easily manage every aspect of your EV charging operation via our dedicated operator portal. Our dashboards offer insights on the overall status of your network and its energy usage, while alerts and 24/7 account support are also just a click away.

Easily manage your electric fleet

Gain insight into your drivers' behaviour to optimize your fleet management.

Our cloud-based solution supports all charging scenarios, whether your fleet of drivers charge at home, in depot or at public charge points, ensuring high utilization rates. Gain access to comprehensive reports about charging patterns and the ability to effortlessly compensate drivers who charge at home further optimize the charging process.

A system that grows with you

Our platform is fully scalable and capable of managing networks of any size.

It doesn't matter how many drivers are on your network, our system is modular and configurable so can support your business model and needs as they evolve.

"Driivz has thought ahead to what the market is going to look like in the next five years."

Jonathan Tudor,
Director of Technology and Innovation Strategy

centrica

OUR SOLUTIONS

Our platform can be adopted across numerous domains, connecting an ever-growing network of drivers to all types of chargers.

- Workplace
- Public
- Semi-public
- Home
- Fleets

OUR SECTORS

Our platform helps to increase driver retention across all sectors.

- Utilities
- Oil and gas
- Municipalities
- Automotive
- Electric

We are the operating system for global EV charging, unlocking the future of energy management.

Since 2012, we have been developing a future-proofed, intuitive platform with extensive functionality. Our platform ensures seamless driver experience, delivers high reliability and reduces costs for our customers, while providing advanced energy management tools and billing operations to generate additional profits.

Supporting the world's largest charging networks as well as new market entrants, the Driivz platform will underpin a smooth transition towards a robust EV charging network, worldwide.
